

LEED Accreditation Made Easy

If your company wants to compete on LEED certified projects, you need to have the right training and credentials. The LEED Green Associate accreditation was designed by the USGBC for contractors, owners, project managers and sales staff to have the proven knowledge to work on green buildings.

MCAA has developed the *only* DVD-based LEED Green Associate training module. The DVD allows you to get the best visual representation of the concepts, tools and techniques that are essential in the green building process.

As you watch the DVD, the training manual includes all the relevant reference data and sample questions, broken down by each chapter.

Through an online webinar, you will receive specific guidance on areas of focus as well as clarification of concepts.

The MCAA Green Associate Training Module Includes:

- LEED Green Associates DVD
- LEED Green Associates Training Manual
- Live Webinar with Experienced LEED Trainers
- Certificate of Completion (pre-requisite for LEED Green Associates Exam)

Visit www.mcaagreen.org to purchase

MCAA Member Price: \$450

Non-Member Price: \$750

Additional User License: \$350*

*Each module is limited to one user per webinar, additional licenses may be purchased for additional users from the same company. A full-price training module must be purchased along with additional user licenses.
